## Indian Headlight Install

- Ridermike VDR# 76 (Grimace)(Delphi Vulcan Drifter Forum)

RiderMike has successfully transplanted a headlight for the Gilroy Indian Scout or Spirit onto the Drifter.

Parts:

[Headlight](#) - PN 990-909

Existing Drifter Mounting plate -

[Adapter Block](#) - P/N

Nabu and others have the nacelle and teardrop light from Doss. I have just an Indian headlight from JP Cycle and others. I removed the stock assembly leaving the original mounting bracket. Bought a generic headlight mounting block from JP Cycles. Drill one hole on the original bracket and mount. Kind of looks like a springer head light.
